Культиватор Shtenli 1030 (8, 5) колёса 7x12 без вом

Культиватор Shtenli – multifunctional equipment, which is used by farmers for soil loosening and other types of agricultural work.

The four-stroke diesel engine with 8.5 horsepower has high reliability. The cultivator works on automotive motor oil. The Shtenli cultivator allows cultivating and processing soil in heavy conditions on inaccessible areas.

The main advantage of the cultivator – low fuel consumption. You can work continuously and not worry about refueling. For the cultivator, low emissions are also characteristic.

The handle has a lock for the coupling lever, which creates additional convenience during long tiring work. Manual engine start with the help of the power selector lever allows connecting the shaft with a splined connection. During work, the shaft is completely protected from slipping, jamming and vibration.

The steering column of the cultivator is adjustable in height and horizontally, which makes it easier for the operator to work. It does not cause difficulties in plowing soil even on a plain. Pneumatic wheels 6, 50x12 allow developing a large traction and increase the stability of the cultivator. Working became much more convenient even on uneven ground thanks to the anti-vibration system.

Гарантия 24 месяца.

Предпродажная подготовка.
